Lab 1: Create IAM roles and policies

Part 1: Create a Custom IAM Policy

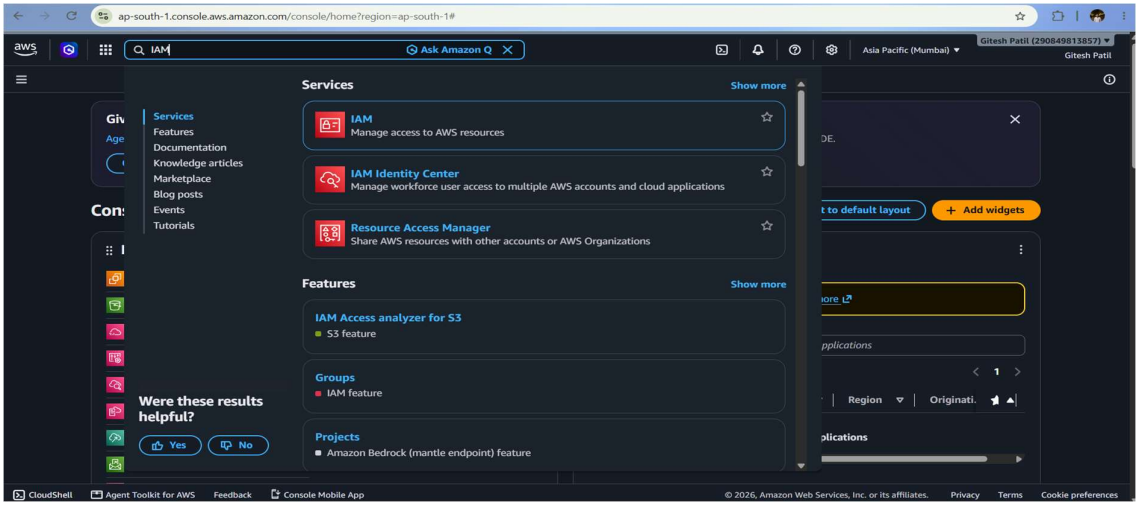

Step 1: Login to AWS Console

1. Go to https://console.aws.amazon.com/

Step 2: Navigate to IAM

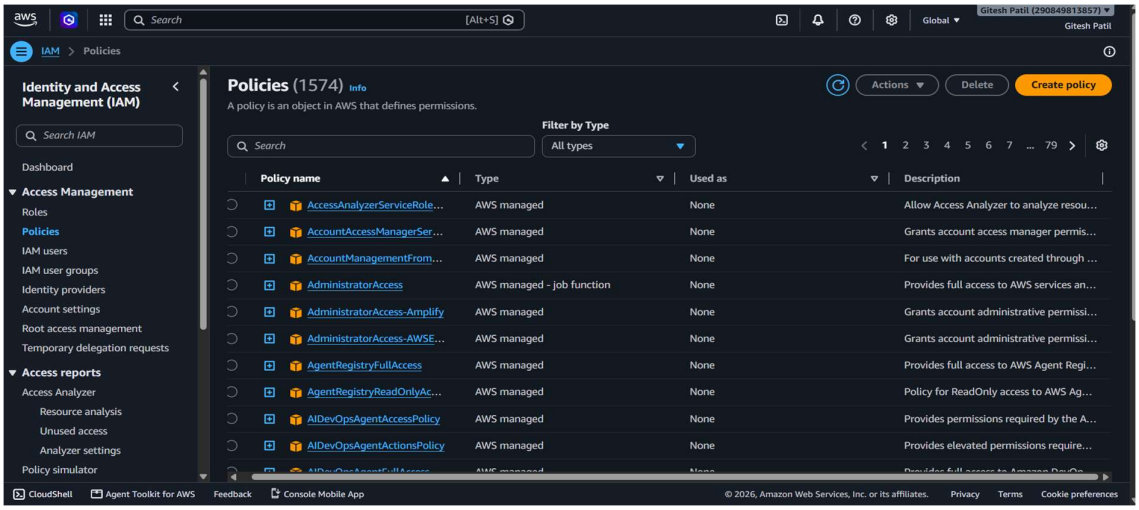

1. In the AWS Services search bar, type IAM

2. And then Click IAM

Step 3: Create a New Policy

1. In IAM Dashboard > Left menu > Click Policies

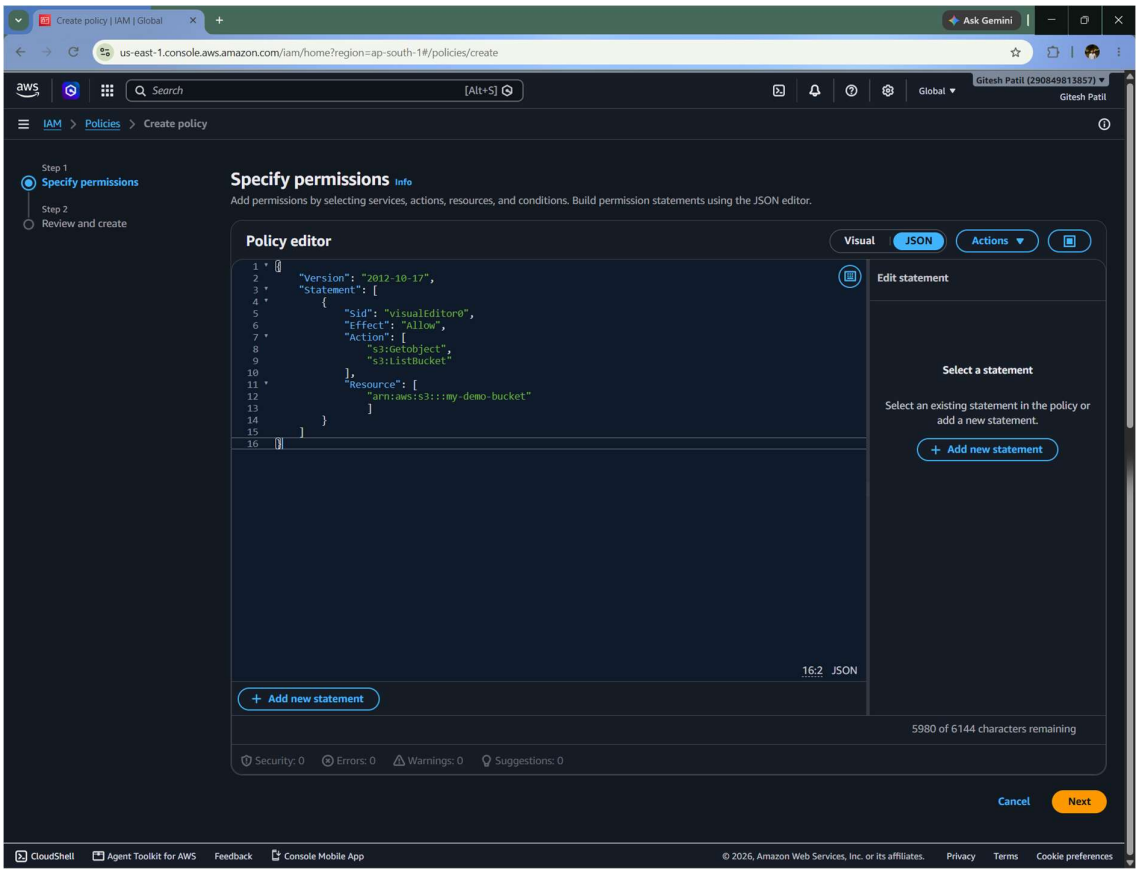

Step 4: Choose a service

1. Choose Service > Select S3

2. Inside Policy Editor paste the following policy

```
{
"Version": "2012-10-17",
"Statement": [
        {
        "Sid": "visualEditor0",
        "Effect": "Allow",
        "Action": [
                "s3:Getobject",
                "s3:ListBucket"
        ],
        "Resource": "arn:aws:s3:::my-demo-bucket"}]}
```

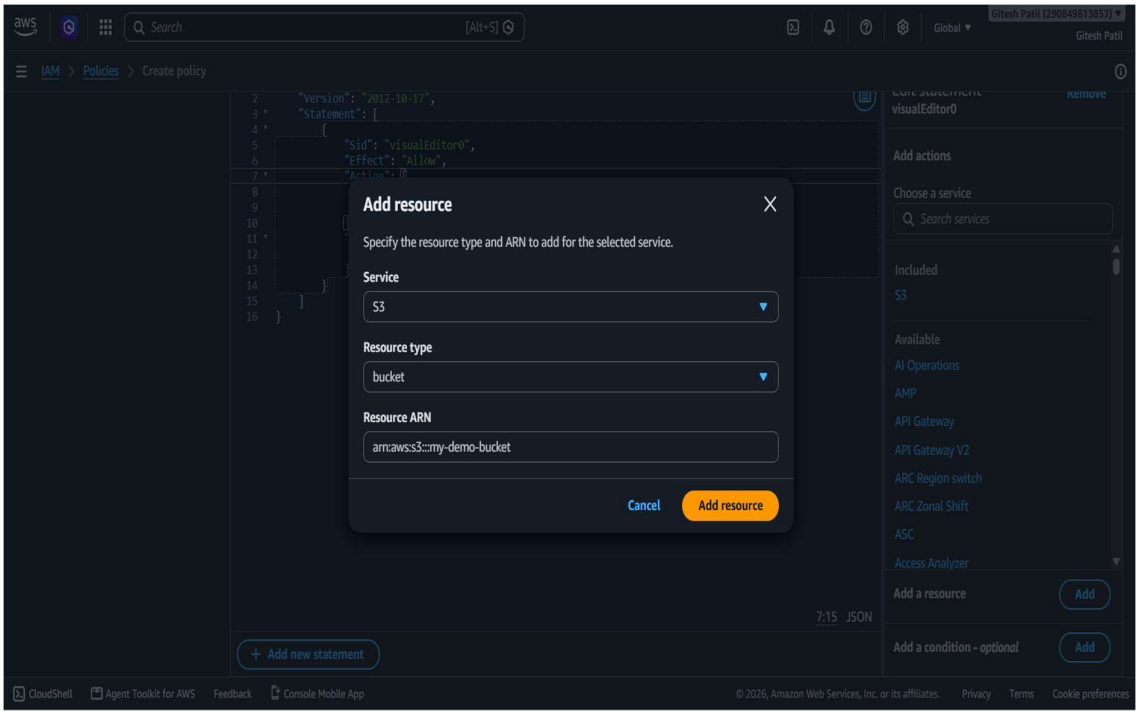

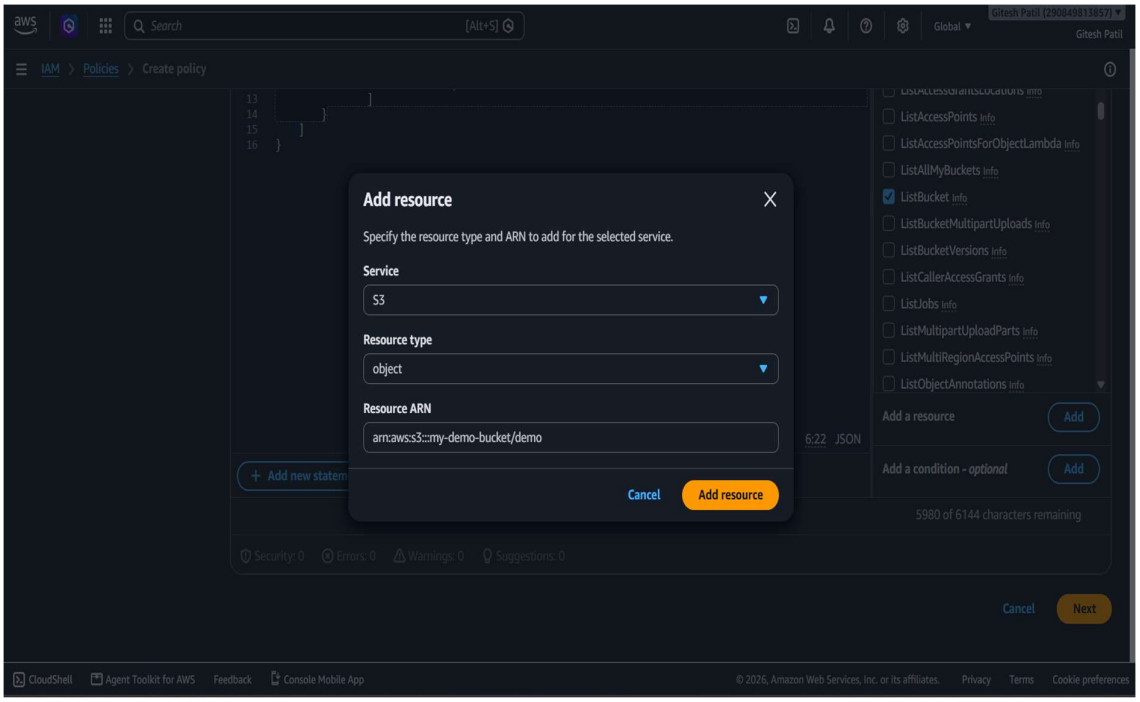

3. Under Resources, choose:

. Bucket: Specify ARN

. Enter: arn:aws:s3 ::: my-demo-bucket

. Object: arn:aws:s3 ::: my-demo-bucket/

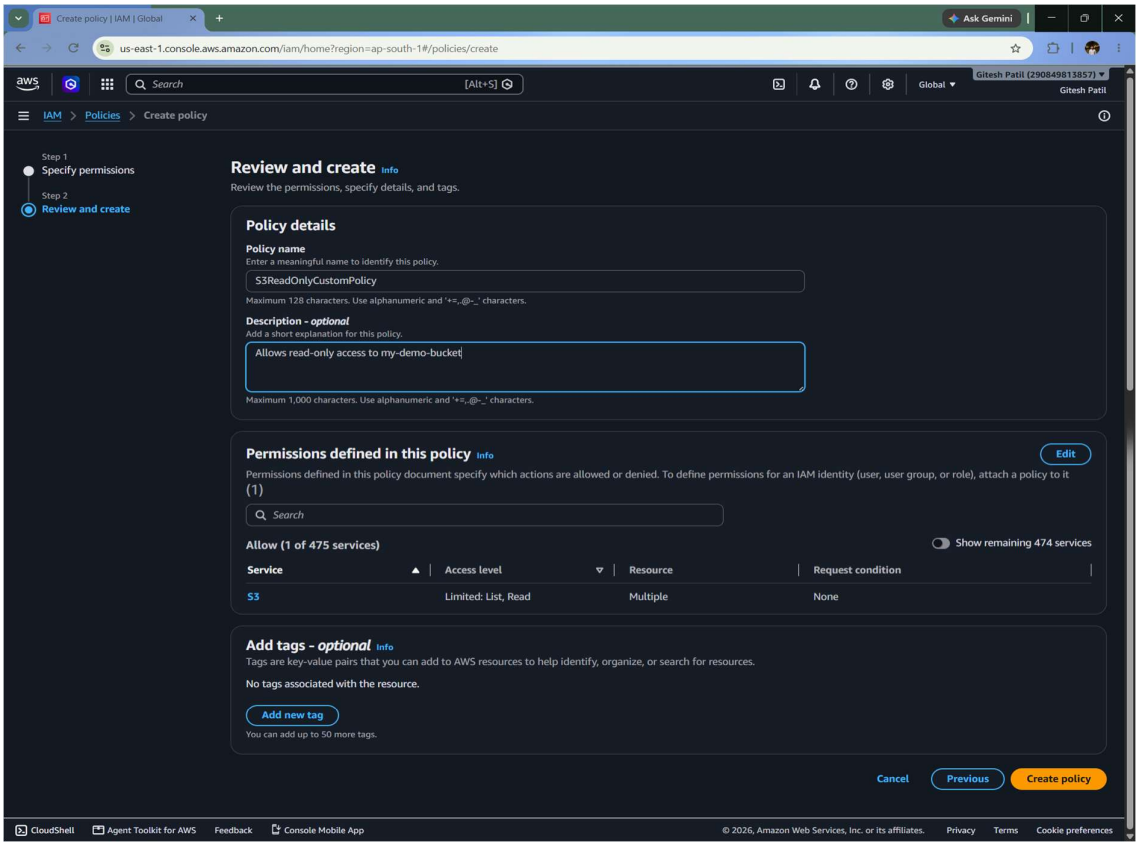

Step 5: Review and Create

1. Click Next

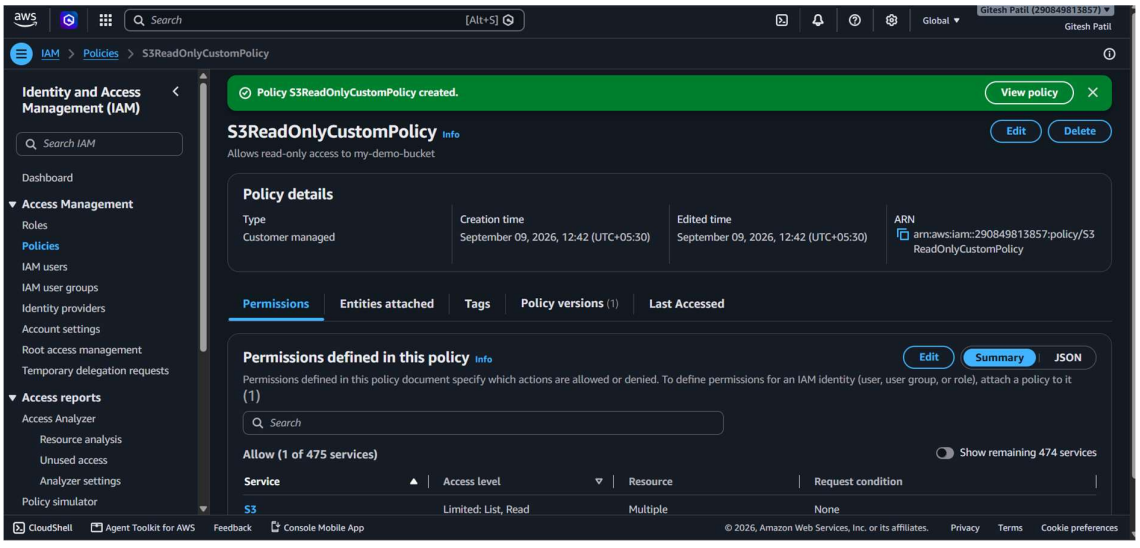

2. Enter policy name: S3ReadOnlyCustomPolicy

3. Add description: Allows read-only access to my-demo-bucket

4. Click Create policy

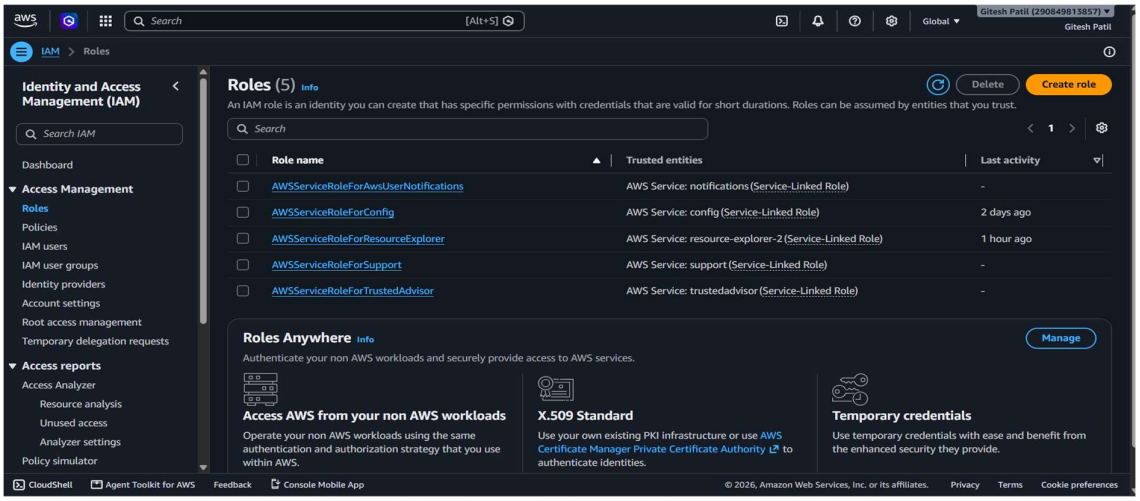

5. Verify if Policy is created by opening the same.

Part 2: Create an IAM Role

Step 6: Navigate to Roles

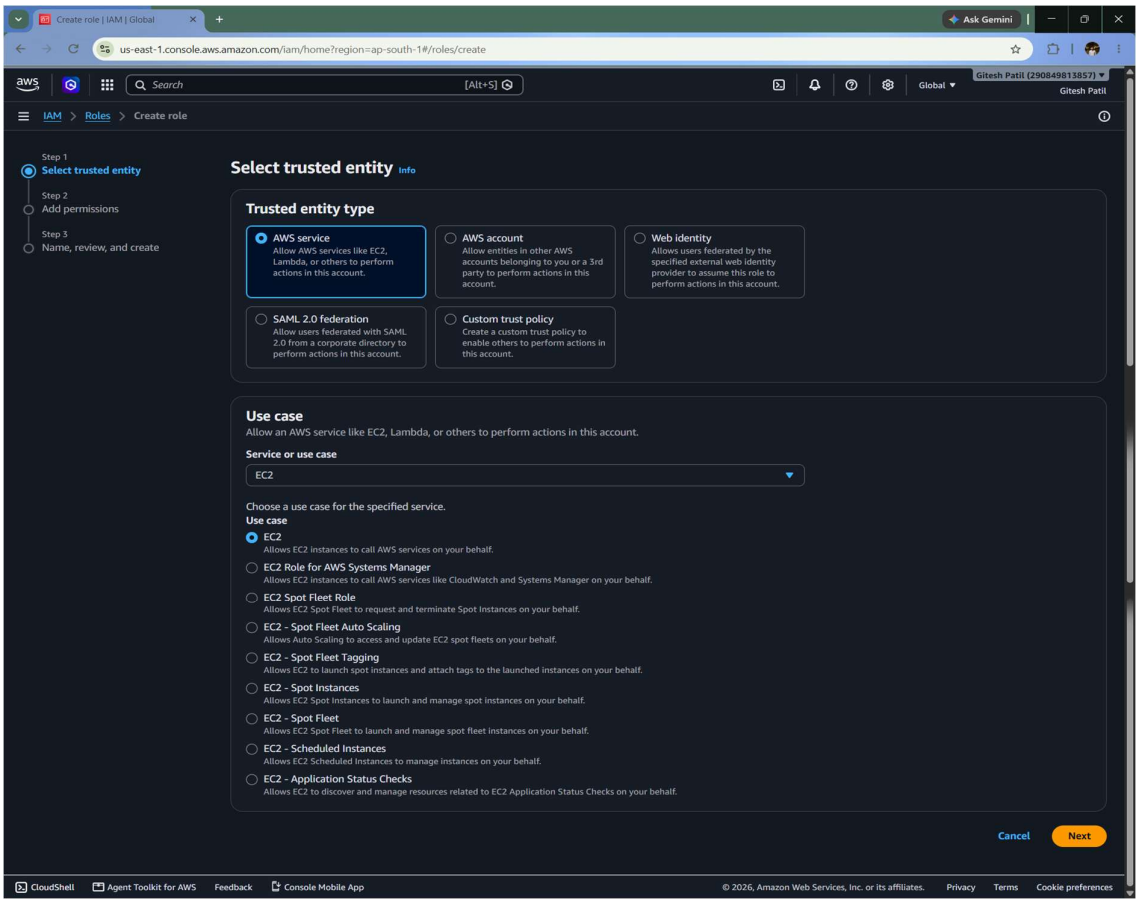

1. Click on Create role

2. Choose a trusted entity type:

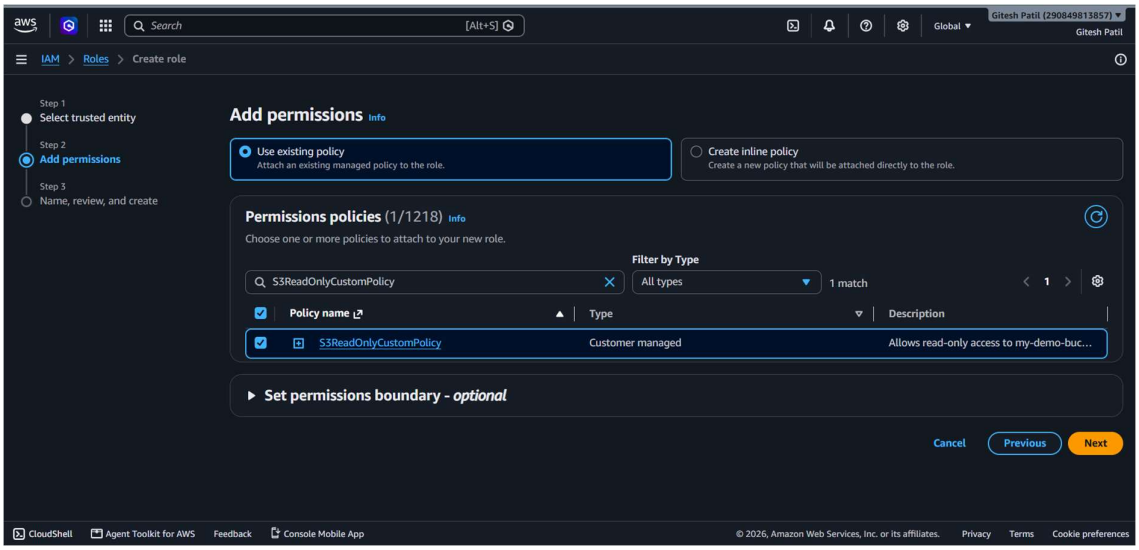

AWS service > EC2

3. Select AWS service and Choose EC2

Step 8: Attach Permissions

1. Search for the policy created earlier: S3ReadOnlyCustomPolicy

2. Check the box

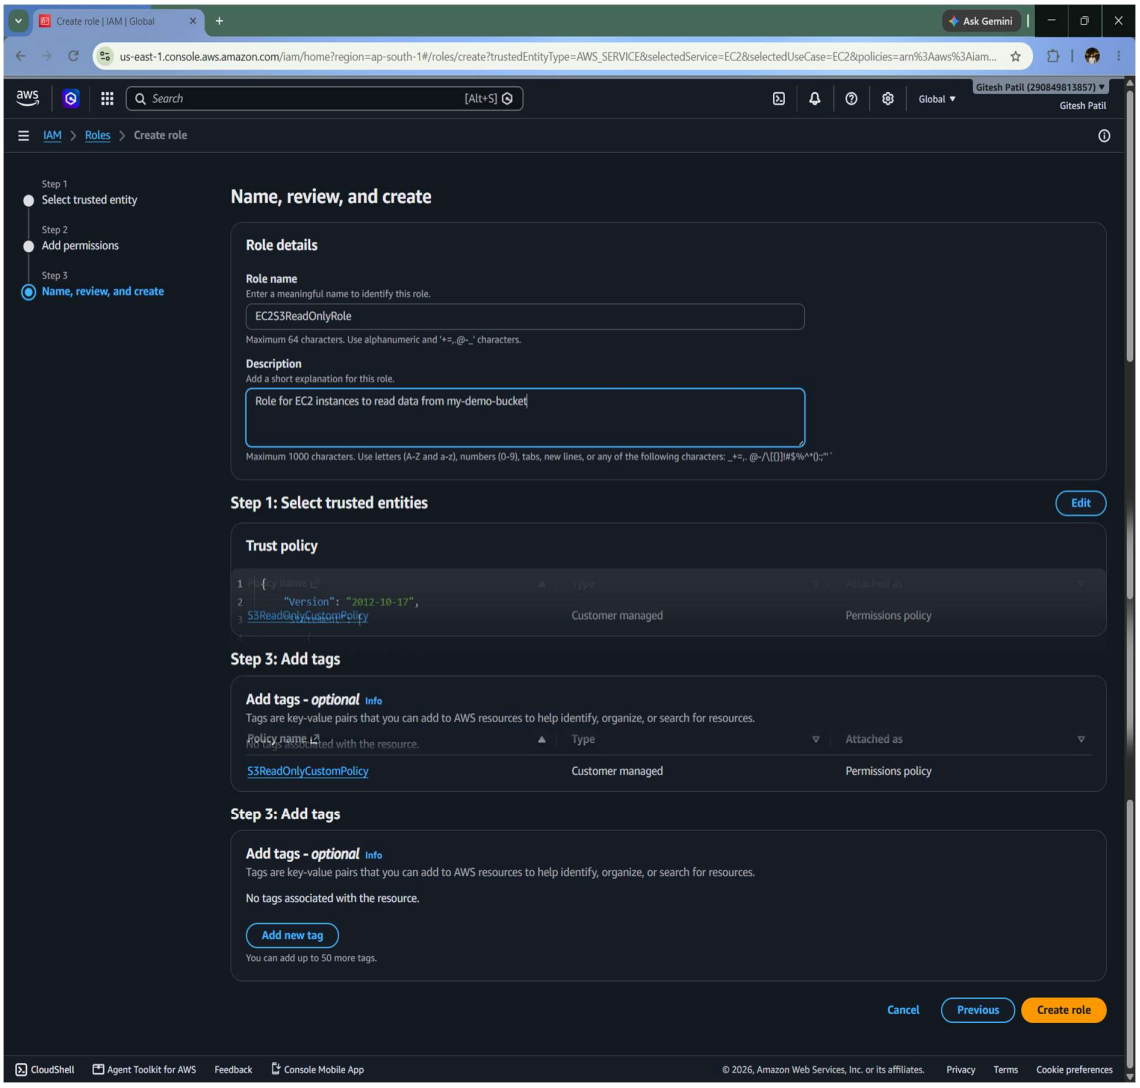

3. Click Next

Step 9: Name the Role

1. Enter role name: EC2S3ReadOnlyRole

2. Add description: Role for EC2 instances to read data from my-demo-bucket

3. Click on Create role

Part 3: Verify the Role

1. After creation, click the role from roles list.
